

## THE ALL-NEW E SERIES, A GAME-CHANGING REVOLUTION

A brand-new family of products is here: the E series of workbenches and workstations. It comes in three main categories: the EW bench frame (a complete redesign of the WM series), the EM freestanding station, and the ElevaTek adjustable workstation. These three categories work in perfect synergy with each other to offer highly configurable solutions with exclusive options, advanced features, and impeccable aesthetics that elevate the user experience.

### EW BENCH FRAME

The superior organization of the WS workstation is now provided by the EW bench frame and its many accessories. Thanks to a logical sizing system, configuring a customized top-tier system is easy by simply selecting panels, shelves, power outlet channels, and various other options.

[Learn more on pages 154-177.](#)

### EM FREESTANDING STATION

Available in stationary and mobile versions, EM freestanding stations can be configured with EW bench frame accessories and integrate seamlessly into a wide range of installations.

[Learn more on pages 246-251.](#)

### ELEVATEK ADJUSTABLE WORKSTATION

Available in electric, crank-operated and manual versions, and in mobile or stationary configurations with centered or cantilever legs, this height-adjustable workstation is incredibly versatile and highly configurable. It uses the same accessories as the EW bench frame, which ensures optimal compatibility and flexibility. ElevaTek is a trademark of Rousseau Metal Inc.

[Learn more about this new product on pages 178-207.](#)

### SMART UNLOCKING : THE L100 LOCK

The L100 provides quick and easy access to cabinets and shelving without the need for keys or codes. Simply use an NFC transponder or smartphone. Certified IP53, it is protected against dust and water sprays, and it can be easily retrofitted into existing setups.

[Learn more about this solution on pages 337 and 338.](#)
